

## Cork fabrics cleaning recommendations

Get familiar with our guidelines to keep your cork fabric clean and in a good condition. Following our advices is recommended to extend the life of the fabric.

⇒ **Wipe up spills as soon as they occur**

Do not postpone cleaning of the fabric. The faster you wipe up spills or brush off dirt, the easier they will come out of the fabric. Make sure you clean the fabric before the spill is dry or the dirt becomes embedded.

⇒ **Clean with soap**

Apply a light mist of water with mild soap using a cloth or a spray bottle. Work the solution into the spill by lightly agitating the entire surface area of the fabric, moving from seam to seam, with a sponge or very soft bristle brush. Avoid scrubbing, and do not use a hard bristled brush or anything that will abrade the fabric. Rinse the entire fabric thoroughly to remove all soap residue. Blot excess moisture with a clean, soft towel or sponge and leave to air dry.

⇒ **Professional cleaners**

Inquire about a firm's experience working with cork fabrics and knowledge of cleaning.

⇒ **Machine washing**

Machine wash in 40 degrees on the delicate cycle with normal amounts of mild laundry detergent. Allow fabric to air dry.

Do not saturate/soak material with cleaner/disinfectant. Please use all cleaning and disinfecting agents safely and as instructed. The use of other cleaning agents, disinfectants, conditioners, or protectants can degrade fabric performance. Information provided above is not a guarantee.
